No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Score

TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO KLEBSIELLA
TITLE OF INVENTION: NUMBER: OS 2004001
CURRENT PEPTICATION NUMBER: US,09/489,039A
CURRENT FILING DATE: 2000-01-27
PRIOR APPLICATION NUMBER: US 60/117,747
PRIOR PELING DATE: 1999-01-29
NUMBER OF SEQ ID NOS: 14342
SEQ ID NO 13377
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ; LOCATION: (62); CTHER INFORMATION: Xaa equals any of the naturally occurring L-amino acids US-09-757-028-2046

PCT-US99-26796-75

Sequence 75, Application PC/TUS9926796

GENERAL INFORMATION:
APPLICANT: United States Government as Represented by the APPLICANT: Secretary of the Navy
TITLE OF INVENTION: Chromosome 2 Sequence of Human Malaria Parasite
TITLE OF INVENTION: Plasmodium Falciparum and Proteins of Said
TITLE OF INVENTION: Chromosome Useful in Anti-malarial Vaccines and
TITLE OF INVENTION: Diagnostic Reagents
FILE REFERENCE:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Score 33; DB 20; Length 214;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Sequence 25,

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
